

Government commitment

John Key
former Prime Minister

"The Government will progress its extension of ultra-fast broadband, towards the target of reaching 80 per cent of New Zealanders."

Steven Joyce
Information Technology Minister

"The Government is committed to partnering with the private sector to accelerate the roll-out of ultra-fast broadband services to 75 percent of New Zealanders within the next ten years."

Amy Adams
Communications Minister

"Faster and more reliable connectivity is vital to all New Zealanders, and the Government's UFB and RBI rollouts are lifting speeds and access right across the country."

875 thousand New Zealanders are connected to ultra-fast broadband - 3.7 million to go. This presents huge opportunities for eligible technicians.

Imagine what we can achieve together...

FibreTech has simplified the tough bits on which many small businesses fail. It's a one-stop shop for independent contractors to set up a company, get a vehicle, specialised gear, comprehensive insurance and bank finance for it all. We support you and help you through your first twelve months in business.

This is a turn-key business.

From day one you have a full toolkit, vehicle, insurance, finance and as much work as you can handle ...

FibreTech

Offering a one-stop-shop approach to those stepping up from employees, to independent contractors

Chorus, through its partners, needs owner-operator contractors to install fibre for New Zealand's ultra-fast broadband network.

FibreTech offers a turn-key opportunity to eligible technicians who would like to be their own boss as they work on the huge fibre rollout.

We offer a package that includes any vehicle, complete tool kit, business protection insurance, commercial insurance, and help with: the books, tax management, invoicing and company formation, and ongoing support.

Bring your existing vehicle and gear into the deal or we set you up with everything new - it's your choice.

And we have banking partners to finance you into your new company with your existing, or new, vehicle or gear.

Your Business

Walk into your own business with accountancy, insurance, vehicle, work-flow, finance and more work than you can handle throughout the roll-out.

Buy new or we will finance your current van and equipment

Dodge small business pitfalls

We'll look after the hard stuff - we'll set you up in your company, insure you, outfit you and finance the lot. Then we'll sit down with you and support your new business.

"We think a technician accepting this offer will find a rewarding career on the ultra-fast broadband rollout, free of the pitfalls that often sink small businesses" - FibreTech

How FibreTech Backs Your Business

We've covered everything you need to walk into your new contracting business and work productively from day one.

A full tool kit-out

We provide all tools and technical equipment needed for your work in the rollout. If you have the gear already, bring it along.

Business protection

FibreTech has a unique business debt-protection cover included in the package

Commercial insurance

We have a comprehensive insurance plan for your business - tools of trade, vehicle and liabilities. You're covered!

Accounting and tax

Mitchell/Davies will help you set up your company, do its books and teach you about tax, invoices and claiming GST
